About Me

As a recent Computer Science and Engineering (CSE) graduate from American International University-Bangladesh (AIUB), I am seeking an internship or entry-level opportunity in Artificial Intelligence, Data Science, Data Analytics or Software Development. Through academic research and technical projects, I have developed a strong foundation in Python, Machine Learning, Data Analytics, Computer Vision, Image Processing, Microsoft Excel, Power BI and Tableau. Passionate about leveraging data-driven technologies to solve real-world challenges, I am eager to apply my analytical, problem-solving, and research skills to develop innovative solutions while contributing to organizational success. Committed to continuous learning and professional growth, I aspire to build impactful technologies that create meaningful business and societal value.

Educational Qualification

01/2023 – Present Dhaka, Bangladesh	Bachelor of Science in Computer Science & Engineering American International University - Bangladesh
--	--

Skills

Programming Language C++, JAVA, JavaScript, PHP, C#, Python.	Data Management MS SQL Server, Oracle
Data Analytics Pandas, NumPy, Matplotlib, Plotly, Spreadsheet, MS Excel, Power BI	Soft Skills Communication, Critical thinking, Teamwork, Data Storytelling, Adaptability, Eagerness to learn
Computer Science Core Object-Oriented Programming (OOP), Data Structures, Algorithms, Human Computer Interaction, Machine Learning, Data Warehouse and Data Mining, Management Information Systems	Tools VS Code, Codeblocks, Jupyter Notebook, Canva, Figma, Version Control (Git)

Languages

Bengali Native	English Fluent
German Conversational	Arabic Reading

Certificates

AI Awareness: Opportunities, Risks, and Responsibility Attended a professional seminar on artificial intelligence, AI ethics, governance and responsible AI applications.	Network Smarter with AI Learned practical applications of AI for professional networking, collaboration and digital productivity.	AI-Powered Communication Applied AI tools to enhance communication, workflow efficiency and professional productivity.
---	---	--

Courses

Mastering Power BI Report Design

Udemy

Developed interactive dashboards, data models and business intelligence reports using Power BI, Power Query and DAX.

SQL for Data Analysis

Udemy

Performed data querying, filtering, aggregation, joins and reporting using SQL for data analysis.

Artificial Intelligence and Machine Learning Fundamentals

Grameenphone Academy

Developed a strong foundation in AI, machine learning, supervised and unsupervised learning and predictive analytics.

Projects

Hotel Booking Management Systems

HTML, CSS, Javascript, PHP, MS SQL, AJAX, JSON

- Developed a full-stack hotel booking system with room booking and reservation management.
- Implemented CRUD operations using PHP and SQL with AJAX and JSON for dynamic data handling.
- Applied client-side and server-side validation to ensure secure and accurate data processing.

MediTrust - Hospital Management System

HTML, CSS, JavaScript, AJAX, JSON, PHP, SQL

- Developed a full-stack hospital management system to manage patient records, doctor information, and appointment scheduling.
- Built secure CRUD functionalities using PHP and SQL, with AJAX and JSON for seamless data updates.
- Implemented input validation and database integration to ensure efficient and reliable healthcare data management.

Publications

Research Project: Food Quality Assessment Using Computer Vision

(Manuscript in Preparation)

- Conducting research on automated food quality assessment using computer vision and deep learning techniques.
- Developing image classification models to identify and categorize food quality based on visual features.
- Performing image preprocessing, dataset preparation, model training and performance evaluation.
- Currently preparing the research manuscript for submission to a conference.

Undergraduate Thesis (Ongoing) : Navigating Dhaka's Unpredictable Traffic - A Quantitative Study of False Congestion Alerts on Google Maps Due to Rickshaw and CNG Blocking

AIUB | Ongoing

- Quantitative analysis of Google Maps traffic prediction accuracy in Dhaka.
- Focus on the impact of rickshaws and CNGs on false congestion detection.
- Technologies: Python, YOLOv8, OpenCV, Computer Vision, Data Analysis.
